Blood Pressure Cuff Barrier

The MedSource Blood Pressure Cuff Barrier is a single-use, sleeve-like barrier that protects patients from contaminations. Our blood pressure cuff barrier is the better solution in the fight against cross-contamination than expensive, disposable blood pressure cuffs or spending time disinfecting the cuffs. The blood pressure barrier cuff is made of non-woven, poly-propylene with elastic ends.

Specifications:

50cm x 29cm

Gram Weight: 35g

Rev. 1
